

23rd International Conference on Knowledge-Based and Intelligent Information & Engineering Systems

4-6 September 2019

Our paper 'Concept of expert system for creation of personalized, digital skills learning pathway' was presented on 2nd Symposium on Information Systems and Technologies for Management, Economy and Decision Making located on 23rd International Conference on Knowledge-Based and Intelligent Information & Engineering Systems. In the paper the expert system for creation of personalized digital skills learning pathway is proposed. The system runs on the DigComp framework to generate the user path, which consists of the ordered set of project learning resources from Digital Skills Accelerator. Selected resources best fit user's digital skills profile and will help in raising his/her digital competence.
